100007BS004	This course is delivered over the internet	Diagnostic	3 hours

Description

Not sure how good you are with numbers? Think you could do with some help in certain areas – but you're not sure which ones?

Number Skills Check is the first step to improving your number skills. You will be asked to answer lots of different number questions. Don't worry – they are set in a fun way so it won't seem too much like hard work!

The answers you give are checked against national standards. By the time you finish the course you will know exactly which areas could do with some extra practice.

Don't let your number skills hold you back – take the first step to number confidence with Number Skills Check.

What will I learn?

When you have finished the course, you will be able to:

- Understand how strong or weak your number skills are in different areas
- Print out a learning plan to help you improve your number skills

What skills do I need to go on the course?

The staff at your local **learnirect** centre will assess your skills. Once they have assessed your skills, they will help you to decide if this is the right course for you.

Course modules

- Number
- Measure, Shape and Space
- Data Handling
